Total Components: 82 | Unique Components: 9

Qty	Component Type	Value	Package	Manufacturer	Part Number	Layer
18	Capacitor	Capacitor	-	-	-	top
3	Connector	Connector	-	-	-	top
12	Diode	Diode	-	-	-	top
4	Inductor	Inductor	-	-	-	top
1	Integrated Circuit	LM324N	Other	STMicroelectronic	LM324N	top
Notes: The LM324 is a low-power quad operational amplifier featuring four independent, high-gain, internally frequency-compensated op-amps. It supports a wide power supply range, operating from a single supply of +3V to +30V or dual supplies of ±1.5V to ±15V. Key features include a wide gain bandwidth of 1.3MHz, a large voltage gain of 100dB, and very low supply current per amplifier of 375µA.						
2	Power Energy	Power Energy	-	-	-	top
2	Relay	Relay	-	-	-	top
35	Resistor	Resistor	-	-	-	top
5	Transistor	Transistor	-	-	-	top
